IT/OT Cybersecurity and Infrastructure Assessment Services

The First Step to a Resilient, Future-Ready Operation

OUR OFFERING:

Our IT/OT Assessment identifies network risks and gaps, delivering clear, vendor-neutral recommendations to align IT and OT systems, improve security, and support future growth.

WHAT YOU GET:

- Network mapping and visibility into “what’s talking to what”
- Device health check and detailed asset inventory
- Evaluation of compliance posture and cybersecurity risks
- Vulnerability scanning and prioritized remediation roadmap
- Budget-level estimates and a phased implementation plan

WHY CHOOSE US:

- We understand both the plant floor and the enterprise network, effectively bridging the IT/OT gap
- Cross-industry experience: Food & Bev, Pharma, CPG, Discrete Manufacturing, and Mission Critical
- Scalable solutions aligned to your site’s digital maturity

Discover

- We document, evaluate, and assess your current automation and network infrastructure
- Interview key stakeholders

Assess

- Network infrastructure, logical mapping and segmentation analysis
- Vulnerability scanning and threat surface review

Recommend

- You get a prioritized action plan and a phased roadmap
- Understanding of your current security posture
- Guidance on creating custom mitigation plans based on your needs and industry standards

Beyond Automation and Control

E TECH GROUP

When to Get an IT/OT Assessment?

Planning Your Next IT/OT Upgrade

- Ensure the network can support planned upgrades.
- Reveals gaps in performance and security.

Cybersecurity or Compliance

- Need to meet standards or secure systems?
- Identifies risks, gives a clear plan.

Downtime or Network Issues

- Identify performance issues, security risks, and infrastructure gaps.
- Pinpoints root causes, improves stability.

IT and OT Teams Not Aligned

- Conflicts or unclear ownership?
- Clarifies roles, fosters collaboration.

Planning Digital Transformation

- Modernize but don't know where to start?
- Builds a roadmap based on capabilities.

Before a Security Incident

- A breach or close call?
- Uncovers threats, assesses exposure, and mitigates the chance of compromise.

After a Merger or Expansion

- Align new systems/facilities with standards.
- Maps assets, ensures compatibility.

BENEFITS:

- Gain Network Visibility
- Reduce Risks
- Secure Operations
- Evaluation of Compliance Posture
- Vulnerability Scanning
- Prioritized Upgrade Plan

Beyond Automation and Control
